

99.9% Isopropyl Alcohol

This is a ACS reagent grade IPA for cleaning electronics. It is a flammable, clear solvent that effectively cleans ionic, polar and non-polar residues. It is safe on most painted surfaces, plastics, and elastomers. It leaves no residue, evaporates quickly relative to water, and does not cause corrosion. It is low toxicity compared to alternative solvents and is similarly relatively environmentally benign, being ozone safe with excellent “green solvent” scores.

It is both anhydrous, hygroscopic, and fully miscible with water, so it can be used to scavenge moisture and dehumidify surfaces. It also has a low surface tension, so it wets easily, making it an effective cleaner.

Features & Benefits

Safe on most plastics and elastomers

Fast dry time

Zero residue

Low toxicity

CARB compliant

Conforms to MIL Spec TT-I-735 GRADE A and ASTM D770

Storage and Handling

Store between -20 and 27 °C in a dry area, away from sunlight.
Store in well-ventilated places (see SDS).
